## Professional Summary

Front-End Developer specializing in React.js, JavaScript, and TypeScript. Built and deployed responsive web applications and contributed to a graduation project within an 8-developer team. Experienced in REST APIs, client-side state, responsive UI, and Vercel deployment. Focused on clean, maintainable code and continuous technical improvement.

## Technical Skills

| | |
|---|---|
| **Languages:** | JavaScript, TypeScript, HTML5, CSS3 |
| **Frameworks & Libraries:** | React.js, TanStack Query, Tailwind CSS, Bootstrap, Material UI (MUI) |
| **Tools & Platforms:** | Git, GitHub, REST APIs, Vercel, Serverless Functions |
| **AI Development Tools:** | ChatGPT, Claude, AI-Assisted Coding, Debugging, Code Review |
| **Core Concepts:** | OOP, Data Structures, Responsive Web Design, Version Control |
| **Soft Skills:** | Problem-Solving, Team Collaboration, Communication |

## Work Experience

**FixHub — Graduation Project (Team of 8)** *Mar 1, 2026 – Apr 26, 2026*
*React, Tailwind CSS, JavaScript*

- Built and deployed a service marketplace covering 4 service categories: Electrical, Plumbing, AC, and Carpentry.
- Owned and delivered 4 pages end-to-end (Home, Services, Admin Login, and Admin Dashboard) within an 8-developer team.
- Designed the request-and-offer workflow connecting customers with technicians and contributed to the platform's service management experience.
- Implemented real-time communication features for customers and technicians, along with administrative tools for service management and user moderation.

Live Demo GitHub

**News Feed Application — Independent Project** *Jun 18, 2026 – Jul 2, 2026*
*React, JavaScript, Material UI, REST APIs*

- Built and deployed a responsive news aggregation application in 14 days using the News API, with category filtering, keyword search, and pagination.
- Developed a serverless proxy layer to handle API requests securely, keeping API credentials out of client-side code and resolving cross-origin issues in production.
- Leveraged ChatGPT and Claude to investigate API integration issues, evaluate implementation approaches, and accelerate debugging throughout development.

Live Demo GitHub

**E-Commerce Website — Independent Project** *Oct 7, 2025 – Oct 17, 2025*
*HTML, CSS, JavaScript, Bootstrap*

- Built and deployed a responsive clothing e-commerce website in 10 days, covering 6 product categories with a persistent shopping cart.
- Implemented cart functionality for adding, updating, and removing products with real-time total calculation and client-side data persistence using localStorage.
