

KEROLOS EMAD ANWER

Front-End Developer (React.js) | Fresh CS Graduate

+20 127 860 1803 | keroe7500@gmail.com | [Portfolio](#) | github.com/Kerolos20E | linkedin.com/in/kero-emad-778391269

PROFESSIONAL SUMMARY

Fresh Computer Science graduate (Class of 2026) specializing in React.js, JavaScript, and TypeScript. Independently built and deployed 2 full web applications end-to-end, and delivered 4 pages — including the Admin Dashboard — as part of an 8-developer graduation project. Comfortable working solo or in a team, with a fast learning curve and a track record of shipping working, live products rather than tutorial-style demos.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, TanStack Query, Tailwind CSS, Bootstrap, Material UI (MUI)

Tools & Platforms: Git, GitHub, REST APIs, Vercel, Serverless Functions, UI Design

Core Concepts: Object-Oriented Programming (OOP), Data Structures, Responsive Web Design, Version Control

Soft Skills: Problem-Solving, Team Collaboration, Communication, Adaptability, Time Management

EXPERIENCE

FixHub — Graduation Project (Team of 8) | *React, Tailwind CSS, JavaScript*

- Collaborated with 8 developers to build a service-marketplace platform covering 4 service categories: Electrical, Plumbing, Air Conditioning, and Carpentry.
- Built 4 pages single-handedly: Home Page, Services Page, Admin Login Page, and Admin Dashboard Page.
- Designed a request-and-offer workflow connecting 2 user roles (customers and technicians), streamlining coordination between both sides.
- Implemented a real-time chat feature supporting text, file, and voice messages between customers and technicians.
- Delivered 2 core admin management functions inside the Admin Dashboard: adding/removing services and removing disruptive users.

 Live Demo: fix-hub-eta-ashen.vercel.app/hub | GitHub: github.com/Kerolos20E/FIX-HUB

News Feed Application (Independent Project) | *React, JavaScript, Material UI, REST APIs*

- Built a news aggregation web app powered by the News API, delivering real-time headlines across multiple categories.
- Delivered 3 core features: category-based filtering, keyword search, and Next/Previous pagination to navigate news results.
- Designed and shipped a serverless proxy function to securely call the News API from the server, keeping credentials out of the client bundle and resolving cross-origin restrictions in production.

 Live Demo: news-feed-seven-lilac.vercel.app/ | GitHub: github.com/Kerolos20E/News-Feed

E-Commerce Website (Independent Project) | *HTML, CSS, JavaScript, Bootstrap*

- Built a fully responsive clothing store front-end spanning 6 product categories: Jackets, Jeans, Shirts, Tailor Pants, Chunky Boots, and Knitted items.
- Delivered a 3-action shopping cart (add, update quantity, remove) with live subtotal and total recalculation, persisted using localStorage.
