Summary

React.js Developer with hands-on experience in HTML, CSS, JavaScript, and ReactJS, and three deployed projects including a service marketplace built in an 8-developer team. Builds responsive, user-friendly web pages and reusable components, integrates REST APIs, and debugs and fixes issues (Forage software review and bug-fixing simulation).

Education

Sohag University **Expected 2026**
B.Sc. in Computer Science, Faculty of Computers and AI (GPA: 3.0 / 4.0) *Sohag, Egypt*

Technical Skills

Languages: HTML5, CSS3, SCSS (Sass), JavaScript (ES6+), TypeScript
Frameworks & Libraries: ReactJS (React.js), Next.js, React Router, React Hook Form, Zod
State & Data Fetching: Redux Toolkit, TanStack Query, Context API, REST APIs, Axios
Auth & Backend Services: Firebase (Auth, Firestore, Storage, Hosting), NextAuth.js, Serverless Functions
UI & Styling: Responsive Web Design, Tailwind CSS, Material UI, Bootstrap, GSAP
Tools & Practices: Git/GitHub, Vite, CI/CD, Vercel, Debugging, Root-Cause Analysis, Reusable Components

Projects

Vance & Heir – Watch Store | *React, TypeScript, Firebase, TanStack Query, Tailwind* **Sep 16, 2026 – Oct 16, 2026**

- Live Demo | GitHub
- Developed and deployed a luxury watch e-commerce app on Firebase Hosting within one month, with a filterable, paginated catalog and product detail pages backed by Firestore.
- Structured the UI into reusable React components (Navbar, WatchCard, CartItem) with a responsive layout, sticky navbar, and mobile menu.
- Managed server state with TanStack Query and cart state with Redux Toolkit; added Firebase Authentication (email/password and Google) with protected routes.
- Enhanced user experience with schema-validated forms (React Hook Form, Zod) and scroll-triggered GSAP animations.

News Feed Application | *React.js, JavaScript, Material UI, Axios, REST APIs* **Jun 18, 2026 – Jul 2, 2026**

- Launched a responsive news aggregator with category filtering, keyword search, and pagination within 14 days.
- Integrated the News API using Axios and REST principles, rendering the data in a responsive React interface.
- Engineered a serverless proxy layer to protect API credentials and resolve cross-origin issues in production.

E-Commerce Website | *HTML, CSS, JavaScript, Bootstrap* **Oct 7, 2025 – Oct 17, 2025**

- Created and deployed a responsive clothing store with six product categories within 10 days.
- Implemented add, update, and remove cart actions with real-time totals and persistent cart data using localStorage.

Professional Experience

FixHub – Service Marketplace **Mar 2026 – Apr 2026**
React.js Developer, Graduation Project *Team of 8*

- Launched a service marketplace covering four categories: Electrical, Plumbing, AC, and Carpentry, using React.js and Tailwind CSS.
- Delivered four pages end-to-end: Home, Services, Admin Login, and Admin Dashboard.
- Designed and implemented the request-and-offer workflow connecting customers with technicians, plus real-time communication features.
- Collaborated with seven other developers on service management tools, user moderation, and admin workflows.

Certifications & Languages

Certificates: The Web Front End Learning Guide, Udemy (10 hours) – Jan 2026
Software Development Job Simulation (software review, root-cause analysis and bug fixing), Forage – Sep 2026
Languages: Arabic (Native), English (Intermediate)
