Professional Summary

Junior Front-End Developer specializing in React.js, JavaScript, and TypeScript. Built and deployed 2 independent web applications and delivered 4 production pages as part of an 8-developer graduation project. Experienced in building responsive user interfaces, integrating REST APIs, handling client-side state, and deploying production-ready applications. Strong problem-solving skills with a focus on writing clean, maintainable code and continuously improving technical skills.

Technical Skills

Languages:	JavaScript, TypeScript, HTML5, CSS3
Frameworks & Libraries:	React.js, TanStack Query, Tailwind CSS, Bootstrap, Material UI (MUI)
Tools & Platforms:	Git, GitHub, REST APIs, Vercel, Serverless Functions
Core Concepts:	OOP, Data Structures, Responsive Web Design, Version Control
Soft Skills:	Problem-Solving, Team Collaboration, Communication

Projects

FixHub — Graduation Project (Team of 8)

React, Tailwind CSS, JavaScript

- Built and delivered a service marketplace covering 4 service categories: Electrical, Plumbing, AC, and Carpentry.
- Delivered 4 pages end-to-end (Home, Services, Admin Login, and Admin Dashboard) as part of an 8-developer team.
- Designed and implemented the request-and-offer workflow connecting customers with technicians as part of the platform's core service flow.
- Contributed to the platform's user and service management features, supporting workflows between customers, technicians, and administrators.

Live Demo GitHub

News Feed Application (Independent Project)

React, JavaScript, Material UI, REST APIs

- Built and deployed a responsive news aggregation application using the News API with category filtering, keyword search, and pagination.
- Developed a serverless proxy layer to handle API requests securely, keeping API credentials out of client-side code and resolving cross-origin issues in production.

Live Demo GitHub

E-Commerce Website (Independent Project)

HTML, CSS, JavaScript, Bootstrap

- Built and deployed a responsive clothing e-commerce website covering 6 product categories with a persistent shopping cart.
- Implemented cart functionality for adding, updating, and removing products with real-time total calculation and client-side data persistence using localStorage.
